Choosing the **right** underlay

The Floorwise **Acoustica range** of dense rubber underlays are excellent at **absorbing noise**, both between floors by way of **impact sound reduction** and within the room through airborne noise reduction.

The Whisper range of foam underlays is also very good at absorbing impact noise but does not perform to the same standards as the Acoustica range for airborne sound. The Floorwise range of wood, laminate and LVT Underlays is all rated according to our Sound Reduction guide to help decide which product will be best for your project.

Floorwise Reference: F9AP25/Issue 1/ September 2024

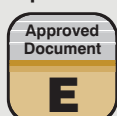

Notes:
1. All values are nominal and may vary within our manufacturing tolerances.
2. Some values may have been derived from the testing of similar products.
